- Write python program to read "students.csv" file, and print out the result.

The file contents shown below:

```csv
id,First name,Last name,Score
1423,John,Wang,94
3543,Helen,Yang,100
8543,David,Martin,60
3842,Tarek,Martin,30
2575,Thomas,Johnson,87
9734,Alen,Geoge,91
```

- Hint: This outline is an almost-complete solution. You only have to replace each ellipsis ... by an expression.

In [ ]:
```python
with open(...) as ...:
    text = ...
print(...)
```

Expected output:

```
id,First name,Last name,Score
1423,John,Wang,94
3543,Helen,Yang,100
8543,David,Martin,60
3842,Tarek,Martin,30
2575,Thomas,Johnson,87
9734,Alen,Geoge,91
```
